Learnings from Developing and Deploying AI Solutions for Social Impact

Makarand Tapaswi is a Principal Machine Learning Scientist at Wadhwanai, a non-profit on using AI for Social Good, and an Assistant Professor at the Computer Vision group at IIIT Hyderabad, India. At Wadhwanai, he leads the ML aspects of developing and deploying several AI solutions that create social impact in education, health, and agriculture. At IIIT, he works on projects at the intersection of video and language understanding, especially related to analyzing or generating stories.
